

# It's Time to Comply

Become greenhouse ready with NCS International

Call us on **1300 856 554** to learn how we can help or go to **MyGreenAudit.com**

**1.** 3rd party certification against ISO 14064 for NGER data.

**2.** GHG Auditor and industry specialist visit your site to validate processes and data.

**3.** The verification team assesses your GHG and energy use data and the supporting processes.

**5.** NCSI provides a documented verification report and verification statement.

**4.** The verification team verifies your NGER data.

Validate your **NGER** data against an internationally recognised standard with **NCS International** - your partner in business assurance and auditing.

# Is your data credible and validated?

## 3rd Party Assurance for NGER data

NCSI can assist your company with the **National Greenhouse Emissions Reporting Scheme** and provide data validation and assurance that your processes and records comply with legal requirements and international standards for data collection and analysis.

**Demonstrate effective risk management in line with your international industry peers and gain ISO 14064 Certification.**

### ISO 14064 Certification

ISO14064 is the international standard for the validation and verification of greenhouse gas emissions. NCSI can provide 3rd party certification to this standard - a unique benefit of being a global certification body.

### ISO 14064 Certification against NGER Data

*"Third party verification [is the]... best way to ensure accurate, high quality data"*

(The Climate Registry, July 24, 2008)

NCSI can certify a business to ISO14064 before you submit your first NGER data – we can certify your processes based on the data collected to date. This will validate the integrity and credibility of your processes and data before you have to submit to the Regulator.

### Verified GHG Emissions Data

Provides confidence that an emission report represents a faithful, true, and fair account of an Entity's emissions to:

- ☀ State and provincial regulatory agencies
- ☀ Investors, suppliers and customers
- ☀ The Registry
- ☀ Your Board of Directors
- ☀ The public and other stakeholders
